KEEP YOUR ENVIRONMENT CLEAN!

Keep yourself, your family, your friends, and your neighbours safe and healthy, by staying clean and keeping your environment clean.

Did you know, poor sanitation and hygiene is linked to diseases like cholera, diarrhoea, dysentery, hepatitis A, typhoid and polio?

When our environment is healthy, so are we. And when our environment gets sick, so do we. Caring for our environment is caring for ourselves.

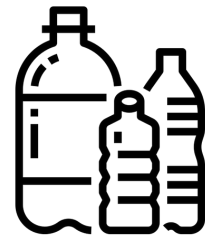

MAKE A TOY ANIMAL USING PLASTIC BOTTLES

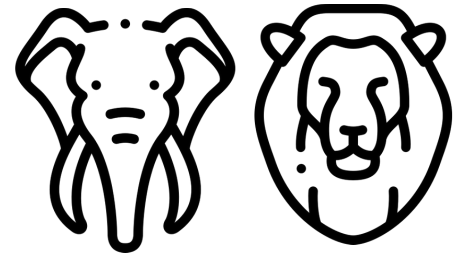

STEP 1: Draw a picture of your favourite animal

STEP 2: Collect plastic bottles from around your house

STEP 3: Use the bottles to make the animal you have drawn

STEP 4: Take a picture of what you have made and share it with your friends. Have fun with your new toy!
